

AoP Principles of Flow

- **Control WIP**
- **Only induct supportable work**
- **Manload work**
- **Resolve issues urgently**

Special Projects Machine Business Rules

- **Speed and quality performance are measured against each gate**
- **Reporting target times will be developed as part of the planning process and will be unique to each project (require key stakeholder approval)**
- **Key stakeholder changes to existing projects will be treated as new projects when:**
 - **They occur after the project plan and problem statement/end state have been approved by the key stakeholder**
 - **Initial requirements were delivered on time**
